

E-ValuTech™

Tailored Technologies' Evaluation Services Can Increase Your Profits and Decrease Expenses with E-ValuTech™

Process. Productivity. Profit.

With technology constantly changing, IT management is crucial to the success of the systems that rely on the IT environment and, ultimately, the staff that uses them. E-ValuTech™ offers an unbiased assessment of your organization's existing IT platform and provides recommendations to position you and your staff for future success.

Tailored Technologies:

- Reviews, analyzes and assesses current technology and communications environment, IT consulting, and staffing requirements
- Reviews the staff's user experience to determine the current technology's value or lack thereof

"We had a feeling our current IT costs were like paying for a Mercedes when what we needed was a good, reliable Honda. Tailored Technologies confirmed our hunch. Richard Nathan invested the time to understand our organization and our team and made important recommendations for us to save money and improve our functioning. His E-ValuTech™ report was extremely clear, yet Richard took the time to come and review it with us. With Richard's guidance and expertise, we are now able to get more productivity out of fewer servers and run our organization more efficiently at a lower cost, which is key for a nonprofit."

—Ed Spauster, President & CEO, Richmond Community Services
